

Public Risk Management Awareness Day

Standing together to recognize and bring awareness of Public Risk Management, for the inaugural Public Risk Management Awareness Day, March 1, 2019. Whether it is a city, county, special district, school district, port authority or political subdivision of the state, public entities by their very nature, have a unique set of inherent risks. Public risk management professionals implement risk management frameworks to reduce, transfer, accept or mitigate those risks, which allows for fiscal stability, decreased liability, reduced reputation risk for the public entity and improved safety.

On any given day or night, public risk management professionals have a great variety of loss exposures within the diverse entities and communities they serve. Public services such as; law enforcement, fire protection, utility services (gas, electricity, water, storm water, sanitation), parks, environmental programs, public education, transportation, etc., by their very nature, increase the possibility that an event will occur having an adverse effect on the achievement of objectives. Managing risk within the constraints of special legal requirements, city charters, state statute and differing accounting/budgeting guidelines is markedly onerous.

Often, public sector risk management also has responsibility for litigation/claims administration, safety programs, risk financing programs including, the purchase of insurance for public buildings or facilities and contractual risk transfer. Using risk control frameworks which support the strategic plan of the entity, public sector risk management professionals scan the environment for risk, identify those risks, perform risk analysis, formulate treatment for risks and monitor treatments/controls and assure the effectiveness of those treatments and controls, all while balancing this with budget constraints, stakeholder expectations and the risk appetite of the entity.

Creative rationale for the logo is that the star is the base for the logo, representing Texas, the state in which the Public Risk Management Awareness Day originated. The five points of the star abstractly represent the five stages/processes of the enterprise risk management process model; scan environment, identify risks, analyze risks, treat risks, monitor and assure. The

colors and reversed wave are a subtle representation of the Port of Corpus Christi, who initiated the day of awareness for public risk management.

The goal is to bring a heightened level of awareness and education throughout communities by giving public risk management a platform to use as a springboard to create special activities, proclamations and publications commemorating every March 1st as Public Risk Management Awareness Day!

**RESOLUTION ADOPTING PUBLIC RISK
MANAGEMENT AWARENESS DAY**

WHEREAS, the Port of Corpus Christi Authority is the first Port Authority, or other Texas governmental entity, to proclaim Public Risk Management Awareness Day; and

WHEREAS, whether a city, county, special district, school district, port authority or political subdivision of the state, public entities by their very nature have a unique set of inherent risks; and

WHEREAS, Public Risk Management Professionals implement risk management frameworks to reduce, transfer, accept or mitigate those risks, which allows for fiscal stability, decreased liability, reduced reputation risk and improved safety for public entities; and

WHEREAS, using risk control frameworks which support the strategic plan of the entity, public sector risk management professionals scan the environment for risk, identify those risks, perform risk analysis, formulate treatment for risks and monitor treatments/controls and assure the effectiveness of those treatments and controls, all while balancing this with political considerations, budget constraints, stakeholder expectations and the risk appetite of the entity; and

WHEREAS, the Port of Corpus Christi wishes to recognize and bring awareness to Public Risk Management by celebrating the inaugural Public Risk Management Awareness Day on March 1, 2019; and

WHEREAS, Public Risk Management Awareness Day will bring a heightened level of awareness and education throughout communities by giving public risk management a platform to use as a springboard to create special activities, proclamations and publications commemorating every March 1st as Public Risk Management Awareness Day;

THEREFORE, BE IT FURTHER RESOLVED that Port Commission of the Port of Corpus Christi Authority of Nueces County, Texas, wishes to proclaim that March 1st of each calendar year is officially designated as Public Risk Management Awareness Day; and

THEREFORE, BE IT FINALLY RESOLVED, that this Resolution be made a part of the permanent minutes of the Port Commission.

ADOPTED this 19th day of February 2019 by the Port Commission of the Port of Corpus Christi Authority of Nueces County, Texas.

PORT OF CORPUS CHRISTI AUTHORITY
OF NUECES COUNTY, TEXAS
